22. Source Reference: ☐NCR (attach) ☐Action Item ☐Tech Ref. ☐GSFC ☒Other: IRIX 6.5 Upgrade

23. Problem: (use additional Sheets if necessary)
The baseline version of Legato Networker does not support IRIX 6.5 and is not supported by the vendor for HP-UX or Solaris as of 5/5/2000. In addition, there are two open sev. 2 NCRs from the DAACs that are fixed by the latest version (5.5.2).

24. Proposed Solution: (use additional sheets if necessary)
Install version 5.5.2 of Networker in the VATC SMC for evaluation. The server should be installed on t1sms03 . Clients should be installed on all machines listed on the attached sheet. Installation instructions must be carefully captured and provided to ICOTS (Lou Swentek) for incorporation into the PSR document. This installation and testing is being performed in the VATC SMC so that it does not interfere with the EDF backup software.

25. Alternate Solution: (use additional sheets if necessary)
N/A

26. Consequences if Change(s) are not approved: (use additional sheets if necessary)
Backup software at the DAACs will not be supported by the vendor, existing NCRs will remain open, and data on IRIX 6.5 machines will not be backed up.
